

INNOX PRO GTX MID TF

PERFECT IN USE.

Lightweight and dynamic, multi-functional and stable - the INNOX PRO GTX MID TF does it all. The versatile all-rounder is perfect for dynamic missions conducted particularly in warm, arid regions. The performance-oriented mission boot stands out thanks to its pleasant rolling properties and the perfect cushioning provided by DynaPU®, a material that LOWA developed itself. The mid-cut upper and sole design provide the best-possible support and safety even when the wearer has to move rapidly. With help of its breathability, the boot's GORE-TEX membrane keeps the foot climate continuously pleasant and is waterproof.

DYNA**PU**®

1 LOWA DynaPU® provides noticeable cushioning with every step.

2 An outsole designed by LOWA with an optimised rubber compound to provide good grip.

3 The double-layer midsole is directly injected onto the footwear. The layers include carefully coordinated degrees of rigidity to create the best-possible comfort.

◀ A special frame design known as LOWA MONOWRAP® provides stability.

COLOURS

Coyote OP 310830 0731

Black 310830 0999

Ranger green 310830 0750

WEIGHT

SUITABLE FOR

Personal Security

The INNOX PRO GTX MID TF is the ideal footwear for personal security work. It combines good comfort with lightweight construction and a discreet appearance to prevent injuries caused by abrupt movements. The outsole comes with a moderate profile and is designed for urban areas.

Event Security

The INNOX PRO GTX MID TF is the ideal footwear for event security. It combines good comfort with robust construction and stable upper design to prevent injuries caused by abrupt movements. The outsole comes with a moderate profile. It can be used both in urban areas and on moderate terrain.

Tactical Units

The INNOX PRO GTX MID
TF is the ideal boot for
tactical units. It combines a
stable upper construction
with lightweight design
and light to moderate sole
stiffness to prevent injuries
caused by abrupt
movements without
limiting manoeuvrability.
The outsole comes with a
moderate profile. It can be
used on urban and
moderate terrain.

Municipal Services

The INNOX PRO GTX MID TF is the ideal shoe for work at the municipal services. The very comfortable footwear includes robust materials and design as well as a discreet look.

SOLE

LOWA® MULTI TRAC®

The triangular profile design used in the sole LOWA® MULTI TRAC® is ideal for multifunctional outdoor uses on moderate terrain. The sole provides pleasant rolling properties, helping to prevent fatigue from setting in.

MIDSOLE

ca. 100 % Polyurethane (PU)

Polyurethane (PU) is a soft plastic that has very good cushioning properties and is usually used in the midsole as a result.
Through the use of PU, the soles become lightweight and functionally flexible.

INSOLE

ca. 45 % Felt

Felt is a textile fabric that is made of disordered fibrous material that is difficult to separate. The textile fabric is characterised by its high elasticity and its insulating qualities. As a result, it is used in particular as a component in insoles and as an insulating divider.

ca. 50 % Memolatex

Memo latex is composed of very soft latex foam. In addition to being lightweight, memo latex supports the natural rolling motion of the foot. It is primarily used in shoe insoles as a result. Memo latex also individually enwraps the foot and is particularly comfortable as a result.

UPPER MATERIAL

ca. 30 % Fabric

Our natural and synthetic fabrics facilitate optimal warming and moisture management with the help of their usage-specific characteristics. Thanks to their structural design, they are smooth and make our products extremely comfortable.

ca. 70 % Synthetic

Our synthetic fabrics made of such plastics as nylon, polyester, polypropylene and elastane (Lycra) are primarily used as design elements and protection for the upper due to their abrasion resistance and tear strength.

LINING MATERIAL

Shoes equipped with a GORE-TEX extended comfort footwear membrane are permanently waterproof and are particularly suited for warm weather.

FUNCTIONS

The footwear is flexible and supports natural rolling properties as a result.

The shoe is equipped with lacing hooks with a closed design. The laces are guided securely and cannot slip out of their hooks. Closed lace hooks minimise the risk of the shoe getting caught on objects.

PPE REGULATION

Please note that if it is intended to use the purchased products as personal protective equipment in accordance with Art. 3 No. 1 of Regulation (EU) 2016/425 (PPE Regulation), the user is responsible for checking the products for the presence of a corresponding certification (see technical data of the product). If the product lacks a certification required for use as personal protective equipment as defined by the PPE Regulation, the product may not be used as personal protective equipment or only for non-professional purposes.
